

Cisco Router Initial configuration

The screenshot displays the Cisco Packet Tracer software interface. The main workspace shows a network topology with a router labeled "1841 Router0" and a PC labeled "PC-PT PC0" connected by a dashed line. The interface includes a menu bar (File, Edit, Options, View, Tools, Extensions, Window, Help) and a toolbar with various icons. The bottom panel is divided into several sections: a search bar for devices, a "Copper Cross-Over" section, a "Scenario 0" section with "New" and "Delete" buttons, and a "Toggle PDU List Window" button. The command prompt shows the following output:

```
User Access Verification
Username: kannan
Password:

Router>show ip interface brief
Interface      IP-Address      OK? Method Status      Protocol
FastEthernet0/0 192.168.10.1    YES manual up          up
FastEthernet0/1 unassigned      YES unset  administratively down down
Vlan1          unassigned      YES unset  administratively down down
